

Automatic Nozzle Mounting Machine for Nozzles with Clip - Mod. ANOZZ

Automatic nozzle mounting machine for standard nozzles with clip to be clipped/ hooked to standard silicone cartridges.

- **Manual feeding** of the cartridges, or **in line** at the exit of an automatic filling machine, on a **step-by-step chain** for cartridge advancement.
- **Automatic feed of the nozzles** from an **orienting hopper with rollers**, patented by Nannini Renato. **Extremely quiet operation.**
- **Hopper for bulk nozzles** with a capacity of about **2,000 nozzles** for **broad autonomy.**
- **Vertical loader** of the nozzles from the hopper to the orienting device.
- Or alternatively with vibrating **circular orienting hopper** with lower capacity but **more compact.**
- **Automatic clipping** of the nozzles to the cartridge and ejection of the cartridge with the nozzle via down- ramp, for manual boxing.
- **Production speed:** up to **40-45 nozzles/cartridges per minute.**
