

# Automatic Nozzle Counting Machine Mod. CBEC

Machine for the automatic counting of nozzles without ring (without clip).

Saves the operator's counting time.

- Compact machine, on wheels for **easy handling**.
- Hopper on the ground for **easy loading of about 2,000 nozzles**.
- **Vertical loading of the nozzles** from the hopper to the orientating/selecting rollers.
- **Roller system for the selection/orientation** of the nozzles **patented by Nannini Renato**, with **very quiet** operation.
- **Counter of the correct number of nozzles to be loaded**, with ejection of each nozzle directly above the cartridges inside the carton placed on the roller conveyor.
- **The number of nozzles can be set** by the operator via control panel.
- Roller supporting filled cartons, for **easy handling**.
