

Manual Press for Cartridge Capping Mod. PM

Machine to manually cap cartridges, also bi-component cartridges.

- **Start Command** with dual sync **safety** button.
- Vertical **cartridge support**.
- **Pneumatic presser** with shape and pressure suitable to the deformation of the plastic cap for the **total evacuation of air** between the plunger and product.
- **Fully** and exclusively **pneumatic supply**.
- **Also available for bi-component cartridges** with interchangeable cap pressure units, for caps with or without air purge valve.
